

MTK Showcases Advanced Bracket Solutions at HONG KONG ELECTRONICS FAIR (AUTUMN EDITION)

From 18 to 21 October 2025, MTK's Foshan office showcased approximately 300 curated bracket products at the Hong Kong Convention and Exhibition Centre, participating in the annual technology extravaganza—HK Electronics Fair(Autumn Edition).

At the MTK stand, the series of bracket products covering multiple application fields demonstrated the company's technical expertise and innovative achievements in structural design, material application, and manufacturing processes through their sophisticated design and reliable performance. This attracted professional buyers, industry partners, and technical experts from both domestic and international markets to stop and engage in consultations and exchanges, significantly enhancing MTK's brand recognition and influence in the global marketplace.

The exhibition participation proved a resounding success. Through this event, MTK not only successfully showcased its advanced products and technologies to a global audience but also gained valuable insights into the latest international market trends and customer requirements. This experience has laid a solid foundation for further expanding overseas operations and deepening international cooperation.
